Seeking a backend developer role specializing in Django, Python, and MERN Stack, driven by a passion for creating efficient and scalable solutions. With hands-on experience in developing robust web applications, I aim to leverage my expertise to contribute to innovative projects .

PROFESSIONAL EXPERIENCE

Intern@Talenrn

SEP 2023 – Oct 2023

Web Developer Intern

- As a web developer intern at Talenrn, I contribute and implementing web solutions, collaborating with teams to enhance user experience and functionality, and learning industry best practices.
- In my internship at Talenrn, I utilized a tech stack - HTML, CSS, and JavaScript to develop responsive web interfaces, ensuring cross-browser compatibility and enhancing user interaction.

Social-Media Application(Self-Project)

DEC 2023 – Feb 2024

- **Description:** A social app built with Django web Framework offers functionalities like dislikes, commenting with replies, real-time chats, and post creation. It ensures seamless user interaction, scalable backend using Django and Python, and robust security(Django-allauth) measures for a dynamic social experience.
- **Tech Stack:** Python,JavaScript,HTML5,CSS, Django,Database:SQLite3,MySQL

Instagram-Clone (Self-Project)

OCT 2023 – Dec 2023

- **Description:** The Insta-clone utilizes React for dynamic UI, Firebase for real-time data management, and Google Auth for secure authentication. Features include likes, comments with replies, chats, post creation, and follow/unfollow functionalities for an engaging social media experience.
- **Tech Stack:** React.js,Firebase,Chakra-UI,JavaScript.

Expense-Tracker (Self-Project)

JUNE 2024 – July 2024

- **Description:**The Expense-Tracker utilizes Django web framework for dynamic server-side rendering, MySQL for Authentication management, and Profile management.Features include monthly, weekly, yearly expenses(like Shopping,Traveling, Vacations etc) tracking expenses
- **Tech Stack:** Python,Django web framework,HTML,CSS,JS ,Database:MySQL
